

BPA Energy Efficiency Weekly Announcements, June 19, 2014

Events

Brown Bag: PTCS Update - Simplifying Measures and Program Delivery -

Join us Thursday, June 19 from 12:00 - 1:00 pm. for an update on the overhaul of the Performance Tested Comfort Systems program. BPA teams have been hard at work to migrate the PTCS online registry, simplify the measure list, roll out the new ASHP spec, expand training opportunities, and much more. This presentation will give utilities a look into how we have leveraged studies of the program and utility feedback so far, and how those changes will be reflected over the next year... [More](#)

NW Ductless Heat Pump Project and Smart Water Heat Initiative (HPWH) Webinar -

Please join NEEA and program partners on Wednesday, June 25, for the first back-to-back quarterly webinar with the NW Ductless Heat Pump Project and Smart Water Heat Initiative (HPWH) teams to update partners on program and marketing activities. NEEA is looking for interested utilities to collaborate on specific DHP and HPWH promotions with utilities, trade allies, retailers and manufacturers throughout the year. These promotions would include limited time mark-downs from partners and marketing support to promote utility and partner branded outreach to the market (no NEEA, NW Ductless Heat Pump Project or Smart Water Heat branding). Please join this webinar for more information... [More](#)

General

Summarizer has Been Updated -

BPA has updated the [Summarizer](#); the new version can be found on the [IS 2.0 file page](#) and within the Resources section of the Energy Efficiency tab (IS 2.0) of your Customer Portal page. This update corrects compatibility issues with the latest versions of several calculators including the Option 1 and Option 2 Custom Project Calculators, and the Compressed Air Calculator. Please download and use this version going forward. If you have any questions or concerns please contact your EER.

Reminder

Reminder: EE Post-2011 Review Workgroup Recommendations and June 20 Big Tent Meeting -

All workgroups have submitted their recommendations to BPA. Workgroups 1 and 4 published addendums to their recommendation reports. The addenda are posted [here](#). BPA wishes to thank all stakeholders who participated in the process and the co-chairs for their time and energy in developing the recommendations. Please join us for the Regional "Big Tent" Meeting at BPA Headquarters in the New Rates Hearing Room, June 20 from 9:00 a.m. to 3:00 p.m. More information on that meeting [here](#).

AirGenerate Increases Heat Pump Water Heater Rebate -

AirGenerate is increasing their rebate to \$750 beginning June 1. Here are the details... [More](#)

Get Your Print Copies of the new 2014 Weatherization Specifications -

BPA has released new [Residential Weatherization Specifications](#), which will go into effect on October 1, 2014. To accompany the specifications, the Residential Program team created a [Residential Weatherization Best Practices Field Guide](#), which expands on the specifications to include best practices and step-by-step instructions. We are happy to ship print versions of both documents to any utilities that would like copies. Please contact your Energy Efficiency Representative by **June 20th** with the number of each document requested for your utility.

Lighting Calculator Series 3 Tutorial Videos Now Available -

The BPA Lighting Team has produced a [series of tutorial videos](#) demonstrating how utilities and trade allies can use the latest version of the BPA Lighting Calculator. These tutorial videos are now available on the [BPATraining Youtube Channel](#).
